Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Note that the numerals in parenthesis are not considered part of the claim wherein the dispensing piece is claimed as including a side facing the sheet and an opposite side facing the same sheet which defines a physically impossible structure.

4. Claims 1, 8, 14, 17, 18 and 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant (4,657,159). Grant discloses a fluid reservoir including two sheets 2, 6, that define a reservoir 8 with 2 being a deformable wall, a dispensing orifice 4, a closure member 16, and a dispensing piece made in one piece integral construction with the sheet 2 that includes a concave dish the center of which is the outlet 4 as shown in figures 1 and 2.

5. Claims 2-6, 9, 11-13 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grant (4,657,159) in view of Provenza (2003/0205583). Grant discloses a fluid dispenser substantially as claimed but does not disclose any side bars. However, Provenza teaches another fluid dispenser having side bars 14 that become radially oriented near the outlet for the purpose of channeling fluid toward the outlet. Therefore, it would have been obvious to one of ordinary skill in the art at the time the

invention was made to provide the dispenser of Grant with side bars as, for example, taught by Provenza in order to channel fluid toward the outlet.

6. Claims 2-6, 11 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grant (4,657,159) in view of Sasaki et al. (5,566,851). Grant discloses a fluid dispenser substantially as claimed but does not disclose any side bars. However, Sasaki teaches another fluid dispenser having side bars 35 for the purpose of channeling fluid toward the outlet. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the dispenser of Grant with side bars as, for example, taught by Sasaki in order to channel fluid toward the outlet.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Laker teaches another flexible dispenser with a closure attached to the opposite sheet from the outlet. Frazier et al. teaches another dispenser with side and radial channels.
